

Fresh Volume Scan — NSE large-caps (≥ Rs 10,000 cr)

Date: 2026-07-20 · Universe: NSE EQ, market cap ≥ Rs 10,000 cr · Signal: last 5-day avg volume ≥ 1.5× the prior 20-day avg · Source: NSE bhavcopy + screener.in + Google News

Analytical research, **NOT investment advice**. A volume build-up is direction-agnostic — it can precede a breakdown as easily as a breakout. The **price target** is a plain technical projection off the 52-week range (52W high if still below it, else a 50%-of-range measured move on breakout) — not an analyst estimate or forecast. The **surge reason** is a best-effort recent-headline match, not confirmed causation — volume can move without news. Check the chart, filings and delivery quality before acting.

Scanned 2307 NSE EQ symbols over 25 trading days; 64 are ≥ Rs 10000 cr with a qualifying volume surge (avg turnover ≥ Rs 20 cr/day).

#	Company	Ticker	Mcap (cr)	Vol surge	5d avg vol	20d avg vol	5d price	Deliv %	Turnover (cr/day)	Price	Target	Upside	Likely reason for surge
